Eaglehook is used by transportation industry leaders

The Eaglehook is a unique innovation in transport trailer and shipping container repair - an expertly engineered mobile system specifically developed to restrain falls from atop transport trailers and shipping containers, by restricting workers engaged in repair or maintenance from traveling to a roof surface edge.

The innovation: fall **RESTRAINT**, not fall arrest!

A ANCHORAGE

B BODY SUPPORT

C CONNECTION

Lightweight, easy-to-use, and mobile, precision engineering of the Eaglehook allows for range of motion - and **FALL RESTRAINT**, not "fall arrest" - a North American first.

- Safe
- Secure
- Lightweight
- Easy to Use
- Ergonomic

Simple, one-person operation

Complete range of motion

A safe, innovative way to address roof repairs, which can cause damaged loads
